

Aramon blanc B

Name of vine variety in France

Aramon blanc

Origin

This variety corresponds to the white mutation of Aramon N.

Synonymy

There is no officially recognized synonym in France nor in other countries in the European Union.

Regulations

In France, Aramon blanc B is officially listed in the "Catalogue of vine varieties".

Use

Wine grape variety

Evolution of area under vines in France

	1958	1968	2000	2008	2016
ha	133	90	43	22	4.6

Description

The description corresponds essentially to that of Aramon N. The young leaves are however not very bronzed and the berry skin color when ripe is greenish-yellow. Certain riper berries may be slightly grey.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	131	232	239	178	188	240	240	227	249
Allel 2	141	232	243	191	196	260	254	259	249

Phenology

Bud burst: 1 day after Chasselas. Grape maturity: period III, 4 and 1/2 weeks after Chasselas.

Suitability for cultivation and agronomic production

This very fertile vine variety must be managed by short pruning.

Sensitivity to diseases and pests

Aramon blanc B is not too sensitive to grey rot.

Technological potential

The grape clusters and berries are very large. The wine produced is flat and lacks finesse.

Clonal selection in France

There aren't any approved clones for this variety at the present time.
