

Arriloba B

Name of vine variety in France

Arriloba

Origin

This variety was obtained in 1954 by INRA by crossbreeding Raffiat de Moncade B and Sauvignon B.

Synonymy

No synonym is officially recognized in France, nor in other countries in the European Union.

Regulations

In France, Arriloba B is officially listed in the "Catalogue of vine varieties".

Use

Wine vine variety

Evolution of area under vines in France

Description

Identification signs include:

- the young leaves are green with bronze patches,
- adult leaves are 3-lobed (rarely 5 lobes) with an open U-shaped petiolar sinus, long teeth with straight sides, moderate anthocyanin pigmentation of veins, jagged leaf blade, involute and the underside with a sparse to moderate coat of upright and flat-lying hairs,
- round-shaped berries.

Genetic profile

Allel 1	131	223	239	178	188	244	240	235	239

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 2	131	229	249	186	188	246	240	245	239

Phenology

Bud burst: same as Chasselas.
Grape maturity: period I, 1 week after Chasselas.

Suitability for cultivation and agronomic production

This variety is vigorous, fertile and productive. It is sometimes susceptible to black stem disease and would appear well adapted to machine harvesting.

Sensitivity to diseases and pests

Arriloba B resists well to grey rot (thick skin).

Technological potential

Grape clusters are moderate sized and the berries are very small. The wine produced is fairly fine and slightly scented.

Clonal selection in France

The only approved Arriloba B clone carries the number 762.
