

## Datal B

### Name of vine variety in France

Datal

### Origin

This variety was obtained in 1956 by INRA by crossbreeding Dattier de Beyrouth B and Muscat d'Alexandrie B.

### Synonymy

No synonym is officially recognized in France, nor in other countries of the European Union.

### Regulations

In France, Datal B is officially listed in the "Catalogue of vine varieties".  
This variety is likewise listed in the Catalogue of Portugal.

### Use

Table grape vine variety

### Evolution of area under vines in France

### Description

Identification signs include:

- the tips of the young shoot have a slight coat of flat-lying hairs
- the young leaves are green with bronze patches,
- adult leaves are orbicular or wedge shaped, 5 or 7 lobes with a U-shaped petiolar sinus, open with parallel edges; moderate size teeth, long compared to width at base, straight sides, slight or moderate anthocyanin pigmentation of veins, smooth and jagged leaf blade and the underside with a slight coat of upright hairs and an absence of flat-lying hairs,
- berries are short elliptical or obovoid shaped.

## Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	133	223	239	182	186	248	248	233	271
Allel 2	147	229	249	191	188	252	248	267	271

## Phenology

Bud burst: 2 days before Chasselas.

Grape maturity: period II, 3 weeks after Chasselas.

## Suitability for cultivation and agronomic production

Datal B displays moderate vigor and its production potential level is high. The shoots grow semi-erect or horizontal. It must be trained and short pruned. It is not very susceptible to coulure but can sometimes be affected by millerandage.

## Sensitivity to diseases and pests

Datal B is a little susceptible to grey rot.

## Technological potential

Datal B grape clusters are very large with a long and not very lignified stalk. The berries are very large and the pulp is firm, not very juicy with a simple flavor and seeds. The grapes must be well exposed in order to obtain good coloration. This variety has a fairly good long distance transport capacity.

## Clonal selection in France

The only approved Datal B clone carries the number 500.
