

Grassen N

Name of vine variety in France

Grassen

Origin

This vine variety is originally from the Alpes-Maritimes.

Synonymy

In France, this variety can officially be called "Grassenc N" for plant multiplication matter.

Regulations

In France, Grassen N is officially listed in the "Catalogue of vine varieties".

Use

Wine vine variety.

Evolution of area under vines in France

Description

Identificationsigns include:

- the tip of the young shoots has a very heavy coat of flat-lying hairs,
- young leaves are yellow,
- adult leaves are orbicular and whole or with 3 lobes with a closed petiolar sinus with overlapping lobes, moderate size teeth with convex sides, an absence of anthocyanin pigmentation, flat leaf blades and the underside with a moderate coat of upright and flat-lying hairs,
- round-shaped berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 2	141	232	257	191	200	252	254	245	249

Phenology

Bud burst: 3 days after Chasselas.
Grape maturity: period II, 3 and 1/2 weeks after Chasselas.

Suitability for cultivation and agronomic production

Grassen N is a fertile vine variety, steady producer which must be short-pruned. It must be planted in poor and well-exposed soils.

Sensitivity to diseases and pests

Grassen N is susceptible to grey rot.

Technological potential

Grape clusters are large to very large in size. Grassen N has low sugar accumulation potential in the berries. It produces fine but not very colored wines.

Clonal selection in France

There are no approved clones for this variety at the present time.
