## Phenology

Bud burst: 1 day before Chasselas.

Grape maturity: early, 1 and 1/2 weeks before Chasselas.

## Suitability for cultivation and agronomic production

Léon Millot N is vigorous and displays horizontal growth and must be long pruned.

## Sensitivity to diseases and pests

Léon Millot N resists well against downy mildew but is somewhat susceptible to powdery mildew.

## Technological potential

Grape clusters are small to moderate in size, not very compact and the berries are likewise small to moderate in size. The sugar accumulation potential is good. Léon Millot N produces acceptable wine quality with the presence of anthocyanin diglucosides.

## Clonal selection in France

There are no approved clones for this variety at the present time.
