

Lledoner pelut N

Name of vine variety in France

Lledoner pelut

Origin

This vine variety is a mutation of Grenache N, particularly focused on villosity.

Synonymy

There are no officially recognized synonyms for this variety in France. In Spain, Lledoner pelut N can officially be called by the name "Garnacha Peluda".

Regulations

In France, Lledoner pelut N is officially listed in the "Catalogue of vine varieties".

This variety is likewise listed in the Catalogue of Spain.

Use

Wine vine variety

Evolution of area under vines in France

	1979	1988	1998	2008	2016
ha	212	625	584	534	298

Description

Identification signs include:

- the tip of the young shoot has a heavy coat of flat-lying hairs,
- the young leaves are green,
- adult leaves have a slightly open or closed petiolar sinus with an occasional presence of a teeth of the edge; elongated median lobe; slightly bubbled leaf blade and the underside with a sparse to moderate coat of flat-lying hairs,
- slightly elliptical-shaped berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	135	223	239	191	188	258	240	243	239
Allel 2	143	238	243	191	188	258	254	243	249

Phenology

Bud burst: 8 days after Chasselas. Grape maturity: period III, 4 weeks after Chasselas.

Suitability for cultivation and agronomic production

This vine variety shares some of the characteristics and potential of Grenache N. It is sometimes considered to be more vigorous and displays less susceptibility to coulure.

Sensitivity to diseases and pests

Lledoner pelut N has the same reaction as Grenache N to the principle diseases except with regard to mites for which it is more susceptible.

Technological potential

Grape clusters and berries are moderate size. Lledoner can display potentials similar to Grenache N, but with slightly lesser natural degree.

Clonal selection in France

The 2 approved Lledoner pelut N clones carry the numbers 1055 and 1056.
