

## Madeleine angevine oberlin B

### Name of vine variety in France

Madeleine angevine Oberlin

### Origin

This table grape vine variety was obtained by C. Oberlin during the 19th century in the Alsace region. Based on genetic analyses carried out in Montpellier, this vine variety is derived from the crossbreeding of Madeleine angevine B and Bouquettraube B.

### Synonymy

No synonym is officially recognized in France for this variety, nor in other countries in the European Union.

### Regulations

In France, Madeleine angevine Oberlin B is officially listed in the "Catalogue of vine varieties".

### Use

Table grape vine variety

### Evolution of area under vines in France

	1958	1968	2008	2016
ha	427	167	7	1.8

### Description

Identification signs include:

- the tip of the young shoots has a heavy coat of flat-lying hairs
- the young leaves are green or yellow,
- orbicular whole leaves with a closed petiolar sinus or with overlapping lobes and a U-shaped base oftentimes limited by a vein near the petiolar point; small teeth with straight sides, an absence of anthocyanin pigmentation of veins, a strongly bubbled leaf blade, jagged and cupped and the underside with a moderate coat of flat-lying and upright hairs,
- elliptical or ovoid-shaped berries.

## Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	133	234	243	178	188	260	254	227	271
Allel 2	133	236	247	178	204	260	254	243	271

## Phenology

Bud burst: 6 days before Chasselas.

Grape maturity: early, 1 and 1/2 weeks before Chasselas.

## Suitability for cultivation and agronomic production

Madeleine angevine Oberlin B is moderately vigorous and grows semi-erect and can be short-pruned. This vine variety is susceptible to millerandage.

## Sensitivity to diseases and pests

Madeleine angevine Oberlin B is not very susceptible to grey rot, powdery and downy mildew.

## Technological potential

Grape clusters are moderate in size and not very compact. The berries have a simple flavor and are likewise moderate in size with moderately thick skin and juicy pulp.

## Clonal selection in France

There are no approved clones for this vine variety at the present time.
