Allel 2	153	234	249	186	200	252	240	267	261

## Phenology

Bud burst: 6 days before Chasselas.  
Grape maturity: period II, 2 and 1/2 to 3 weeks after Chasselas.

## Suitability for cultivation and agronomic production

Nebbiolo N is a variety with very thin shoots and elongated internodes and numerous secondary vine shoots. This variety must be managed and long pruned with careful and proper height training.

## Sensitivity to diseases and pests

Nebbiolo N is slightly sensitive to powdery mildew and grey rot.

## Technological potential

Nebbiolo N grape clusters and berries are small to moderate size. This variety, under good conditions, can produce very high quality wine, relatively acidic, very tannic, moderately colorful with ageing capacity.

## Clonal selection in France

There are no approved clones for this vine variety at the present time.
