

Terret gris G

Name of vine variety in France

Terret gris

Origin

This vine variety corresponds to the gray mutation of Terret noir N.

Synonymy

In France, this vine variety can officially be called "Terret-Bourret G" for plant propagating material.

Regulations

In France, Terret gris G is officially listed in the "Catalogue of vine varieties".

Use

Wine vine variety

Evolution of area under vines in France

	1958	1968	1979	1988	1998	2008	2016
ha	15017	13384	8987	6191	214	131	41

From 1958 to 1988 Terret blanc B and gris G

Description

The description corresponds to Terret noir N except for the skin color of the berries, which at maturity, is gray with elliptical-shaped berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	131	223	243	176	188	252	238	257	239
Allel 2	131	223	247	182	204	252	240	257	239

Phenology

Bud burst: 8 days after Chasselas.
Grape maturity: period III, 4 and 1/2 to 5 weeks after Chasselas.

Suitability for cultivation and agronomic production

Terret gris G displays characteristics comparable to Terret noir N. It is likewise fairly susceptible to browning.

Sensitivity to diseases and pests

The behavior of Terret gris G to diseases is comparable to Terret noir N.

Technological potential

Grape clusters and berries are large. Terret gris G produces neutral wines with a low degree of alcohol.

Clonal selection in France

The only approved Terret gris G clone carries the number 1219. Selection work is underway further to surveys carried out in the vineyards in the Hérault region.
