

## Aramon blanc B

### Name of the variety in France

Aramon blanc

### Origin

This variety corresponds to the white mutation of Aramon.

### Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Legal information

In France, Aramon blanc is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### Use

Wine grape variety.

### Evolution of cultivated areas in France

	1958	1968	2000	2008	2018
ha	133	90	43	22	4.1

### Descriptive elements

The description corresponds essentially to that of Aramon. The young leaves are however not very bronzed and the berry skin color is green yellow when ripe. Certain riper berries may be slightly grey.

### Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	131	232	239	178	188	240	240	227	249
Allel 2	141	232	243	191	196	260	254	259	249

## Phenology

Bud burst: 1 day after Chasselas.  
Grape maturity: late-season, 4 weeks and a half after Chasselas.

## Suitability for cultivation and agronomic production

This very fertile variety must be pruned short.

## Susceptibility to diseases and pests

Aramon blanc is not too sensitive to grey rot.

## Technological potentiality

The bunches and berries are very large. Aramon blanc produces flat wines, without finesse.

## Clonal selection in France

The only certified Aramon blanc clone carries the number 1279. A conservatory of more than 50 clones was planted in the French department of Aude between 2010 and 2014.
