

Aubin vert B

Name of the variety in France

Aubin vert

Origin

This variety is originally from the north east of France (Lorraine) and, based on published genetic analyses, it would result from the crossbreeding of Gouais blanc and Pinot.

Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Legal information

In France, Aubin vert is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Use

Wine grape variety.

Evolution of cultivated areas in France

Descriptive elements

The identification is based on:

- the tip of the young shoot with a medium to density of prostate hairs,
- the green young leaves with bronze spots,
- the shoots with red internodes,
- the adult leaves with three lobes, a V-shaped or with parallel lobes petiole sinus, a weak anthocyanin coloration of veins, a slightly undulate leaf blade and on the lower side of the leaves, a medium density of prostate hairs,
- the round-shaped or obovoid berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	141	225	239	176	188	238	248	227	239
Allel 2	149	232	243	186	196	246	254	235	271

Phenology

Bud burst: 6 days after Chasselas.

Grape maturity: early-season, 1 week and a half to 2 weeks after Chasselas.

Suitability for cultivation and agronomic production

Aubin vert is rather fertile and productive and must be moderately pruned.

Susceptibility to diseases and pests

Aubin vert does not seem particularly sensitive to disease.

Technological potentiality

The bunches are large and the berries are medium in size. Aubin vert produces common wines, not very alcoholic and relatively acidic.

Clonal selection in France

There is no certified clone for this variety yet. Surveys have recently been carried out in vineyards of the north-east of France.
