

## Chardonnay rose Rs

### Name of the variety in France

Chardonnay rose

### Origin

This variety corresponds to the pink mutation of Chardonnay.

### Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Legal information

In France, Chardonnay rose is officially listed in the "Catalogue of vine varieties" since 2018 on the A list and temporarily classified.

### Use

Wine grape variety.

### Evolution of cultivated areas in France

### Descriptive elements

The description corresponds to that of Chardonnay, except for the skin color of the berries when ripe, which is pink in this case.

### Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	135	232	239	178	188	244	238	216	239
Allel 2	141	236	243	186	196	246	254	227	271

## Phenology

Bud burst: 1 day after Chasselas.

Grape maturity: mid-season, 2 weeks and a half to 3 weeks after Chasselas.

## Suitability for cultivation and agronomic production

Aptitudes are close to those of Chardonnay. Chardonnay rose seems to have a slightly later maturity and to be less productive than the white version.

## Susceptibility to diseases and pests

The susceptibilities and tolerances of Chardonnay rose are roughly identical to those of Chardonnay. It tends to be slightly less sensitive to grey rot.

## Technological potentiality

Chardonnay rose's bunches are small and compact. The berries are small to medium and simple-flavored. It produces slightly less acidic wines with a little more sugar than those obtained with Chardonnay.

## Clonal selection in France

The only certified Chardonnay rose clone carries the number 1284.
