

Codivarta B

Name of the variety in France

Codivarta

Origin

This variety is found in Corsica.

Synonyms

In France, this variety can officially be called "Cudiverta" regarding plant propagation material.

Legal information

In France, Codivarta is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Use

Wine grape variety.

Evolution of cultivated areas in France

Descriptive elements

The identification is based on:

- the tip of the young shoot with no or a very low density of prostate hairs,
- the young leaves that are entirely bronzed or with bronze spots,
- the circular or wedge-shaped adult leaves, with five or seven lobes, an open U-shaped petiole sinus, small teeth, long compared to their width at the base with straight sides or with one side convex and one side concave, no or slight anthocyanin coloration, and on the lower side of the leaves, no or a very low density of erect and prostate hairs,
- the round-shaped or broad ellipsoid berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 2	133	225	249	178	204	260	254	259	251

Phenology

Bud burst: 7 days after Chasselas.
Grape maturity: late-season, 4 weeks and a half after Chasselas.

Suitability for cultivation and agronomic production

Codivarta has moderate vigor and a semi-erect to erect bearing.

Susceptibility to diseases and pests

Codivarta is not very susceptible to grey rot.

Technological potentiality

The bunches are large and the berries are medium in size. The sugar potential of this variety is moderate with medium to low acidity.

Clonal selection in France

The only certified Codivarta clone carries the number 1085.
