

## Joubertin N

### Name of the variety in France

Joubertin

### Origin

This variety is originally from the Isère region. Based on genetic analyses carried out in Montpellier, Joubertin would be the result of the crossbreeding between Persan and Peloursin.

### Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Legal information

In France, Joubertin is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### Use

Wine grape variety.

### Evolution of cultivated areas in France

	1958	1968	1979	1988	2018
ha	172	158	8	2	0.4

### Descriptive elements

The identification is based on:

- the tip of the young shoot with a high density of prostate hairs,
- the green young leaves with bronze spots,
- the circular dark green adult leaves, with seven or nine lobes, a slightly open petiole sinus or with slightly overlapping lobes, short teeth, a low anthocyanin coloration of veins, a blistered slightly revolute leaf blade, and on the lower side of the leaves, no or a very low density of erect and prostate hairs,
- the round-shaped or slightly ellipsoid berries.

### Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	149	229	257	182	188	240	240	233	249
Allel 2	149	236	257	186	194	248	262	235	251

## Phenology

Bud burst: 4 days after Chasselas.

Grape maturity: mid-season, 2 weeks and a half after Chasselas.

## Suitability for cultivation and agronomic production

Joubertin is moderately fertile. It can be pruned long or short and it tends to grow many off shoots and suckers. This variety is well adapted to clay and relatively compact soils.

## Susceptibility to diseases and pests

Joubertin does not seem particularly sensitive to the main diseases.

## Technological potentiality

The bunches are large and the berries are medium in size. Joubertin produces very colored, full-bodied, but not very acidic wines. The sugar accumulation potential of this variety is limited.

## Clonal selection in France

There is no certified clone for this variety yet.
