

Liliorila B

Name of the variety in France

Liliorila

Origin

This variety was obtained by INRA in 1956 and is the result of the crossbreeding between Baroque and Chardonnay.

Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Legal information

In France, Liliorila is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Use

Wine grape variety.

Evolution of cultivated areas in France

	2000	2008	2018
ha	3	4	2.7

Descriptive elements

The identification is based on:

- the tip of the young shoot with a low density of prostate hairs,
- the green young leaves with bronze spots,
- the small circular adult leaves, with five lobes, a slightly open or closed petiole sinus, short teeth with straight sides, a twisted strongly blistered leaf blade, and on the lower side of the leaves, a low density of erect and prostate hairs,
- the round-shaped berries with a fragrant flavor.

Allel 2	153	236	249	186	200	256	254	267	239

Phenology

Bud burst: 4 days after Chasselas.
Grape maturity: early-season, 2 weeks after Chasselas.

Suitability for cultivation and agronomic production

This variety has moderate or low vigor and is averagely fertile. The yields obtained with Lilorila remain generally limited.

Susceptibility to diseases and pests

Lilorila is a little susceptible to grey rot.

Technological potentiality

The bunches and berries are small in size. Lilorila produces aromatic, powerful, fragrant wines which are relatively little acidic, especially when over-ripe.

Clonal selection in France

The only certified Lilorila clone carries the number 734.
