## Phenology

Bud burst: same as Chasselas.

Grape maturity: very early season, 1 week and a half before Chasselas.

## Suitability for cultivation and agronomic production

Madeleine royale is moderately vigorous, with a semi-erect bearing and can be pruned short.

## Susceptibility to diseases and pests

Madeleine royale is very susceptible to grey rot.

## Technological potentiality

The bunches are medium in size and compact. The berries are also medium in size, simple-flavored, with a thin skin and a juicy pulp. This variety has a bad storage and transport capacity.

## Clonal selection in France

The only certified Madeleine royale clone carries the number 1323.
