## Phenology

Bud burst: 3 days after Chasselas.

Grape maturity: mid-season, 2 weeks and a half to 3 weeks after Chasselas.

## Suitability for cultivation and agronomic production

Mancin shows early budburst and moderate vigor. It is generally pruned long. This variety is moderately fertile but with a steady production.

## Susceptibility to diseases and pests

Mancin is not very susceptible to powdery mildew.

## Technological potentiality

The bunches are large and the berries are medium in size. Mancin produces fairly balanced, well colored, relatively acidic and not very astringent wines.

## Clonal selection in France

There is no certified clone for this variety yet.
