

## Rivairenc gris G

### Name of the variety in France

Rivairenc gris

### Origin

This variety corresponds to the grey mutation of Rivairenc.

### Synonyms

In France, this variety can officially be called "Aspiran gris" regarding plant propagation material.

### Legal information

In France, Rivairenc gris is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### Use

Wine grape variety.

### Evolution of cultivated areas in France

### Descriptive elements

The description corresponds to Rivairenc, except for the skin color of the berries when ripe, which is grey in this case.

### Genetic profile

| Microsatellite | VVS2 | VVMD5 | VVMD7 | VVMD27 | VRZAG62 | VRZAG79 | VVMD25 | VVMD28 | VVMD32 |
|----------------|------|-------|-------|--------|---------|---------|--------|--------|--------|
| Allel 1        | 131  | 223   | 247   | 176    | 204     | 252     | 240    | 227    | 239    |
| Allel 2        | 131  | 223   | 249   | 178    | 204     | 260     | 248    | 257    | 261    |

## Phenology

Bud burst: 7 days after Chasselas.  
Grape maturity: late-season, 4 weeks and a half after Chasselas.

## Suitability for cultivation and agronomic production

Rivairenc gris appears to be later than Rivairenc, but the other characteristics are comparable.

## Susceptibility to diseases and pests

The behavior of Rivairenc gris towards diseases is similar to that of Rivairenc.

## Technological potentiality

The bunches and berries are large. Rivairenc gris produces light and neutral wines with a fairly low sugar potential.

## Clonal selection in France

There is no certified clone for this variety yet. Surveys have recently been carried out in the wine-growing region of Languedoc.
