

Seinoir N

Name of the variety in France

Seinoir

Origin

Seinoir (an interspecific hybrid) is the result of crossbreeding 5163 Seibel and 880 Seibel.

Synonyms

In France, this variety can officially be called "8745 Seibel" regarding plant propagation material.

Legal information

In France, Seinoir is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Use

Wine grape variety.

Evolution of cultivated areas in France

	1958	1968	1998	2008	2018
ha	5139	4478	190	109	62

Descriptive elements

The identification is based on:

- the tip of the young shoot with a low density of prostrate,
- the bronzed young leaves,
- the pentagonal or circular adult leaves, entire or with three lobes, with a slightly open V-shaped petiole sinus or closed with slightly overlapping lobes, very long teeth compared to their width at the base with straight sides or with one side convex and one side concave, an involute, gophered leaf blade, and on the lower side of the leaves, a medium density of erect hairs,
- the round-shaped or broad ellipsoid berries.

Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	131	242	243	178	188	244	240	237	255
Allel 2	137	261	249	186	194	260	242	241	255

Phenology

Bud burst: 6 days before Chasselas.

Grape maturity: early-season, same as Chasselas.

Suitability for cultivation and agronomic production

Seinoir is moderately vigorous.

Susceptibility to diseases and pests

Seinoir is susceptible to downy mildew and grey rot but resists well against powdery mildew. It must be grafted.

Technological potentiality

The bunches are small to medium in size and the berries are medium size with a foxy and herbaceous flavor. Seinoir produces mediocre, very colored wines with the presence of diglucoside anthocyanins.

Clonal selection in France

There is no certified clone for this variety yet.
