

Terret gris G

Name of the variety in France

Terret gris

Origin

This variety corresponds to the grey mutation of Terret noir.

Synonyms

In France, this variety can officially be called "Terret-Bourret" regarding plant propagation material.

Legal information

In France, Terret gris is officially listed in the "Catalogue of vine varieties" on the A list and classified. This variety is also listed in the catalogue of Croatia.

Use

Wine grape variety.

Evolution of cultivated areas in France

	1958	1968	1979	1988	1998	2008	2018
ha	15017	13384	8987	6191	214	131	40

From 1958 to 1988, Terret blanc and gris.

Descriptive elements

The description corresponds to that of Terret noir except for the skin color of the berries when ripe, which is grey, and for the ellipsoid berries.

Genetic profile

Phenology

Bud burst: 8 days after Chasselas.

Grape maturity: late-season, 4 weeks and a half to 5 weeks after Chasselas.

Suitability for cultivation and agronomic production

Terret gris has characteristics comparable to those of Terret noir. It is also fairly susceptible to browning.

Susceptibility to diseases and pests

The behavior of Terret gris towards diseases is comparable to that of Terret noir.

Technological potentiality

The bunches and berries are large. Terret gris produces neutral wines with a low alcohol degree.

Clonal selection in France

The only certified Terret gris clone carries the number 1219. Selection work is underway following surveys carried out in the wine-growing region of Hérault. A conservatory of ten or so clones was planted in the French department of Hérault in 2003.
