

## Valdigié N

### Name of the variety in France

Valdigié

### Origin

Valdigié would originally be from the Quercy region.

### Synonyms

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

### Legal information

In France, Valdigié is officially listed in the "Catalogue of vine varieties" on the A list and classified.

### Use

Wine grape variety.

### Evolution of cultivated areas in France

	1958	1968	1979	1988	1998	2008	2018
ha	4908	4364	844	273	269	172	88

### Descriptive elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the yellow young leaves,
- the pentagonal adult leaves, entire or with three lobes, with a slightly open petiole sinus with parallel edges or slightly overlapping lobes, short teeth compared to their width at the base with straight sides, no anthocyanin coloration of veins, a blistered leaf blade, undulate between de veins, and on the lowers side of the leaves, a low to medium density of erect and prostrate hairs,
- the round-shaped or slightly ellipsoid berries, with often small berries that remain green.

### Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allel 1	141	223	239	176	196	256	248	235	239
Allel 2	149	236	262	188	202	260	254	267	255

### Phenology

Bud burst: 4 days after Chasselas.

Grape maturity: mid-season, 3 weeks after Chasselas.

## Suitability for cultivation and agronomic production

This variety is fertile, productive, with an erect bearing, and is well adapted to short pruning.

## Susceptibility to diseases and pests

Valdiguié is slightly susceptible to grey rot and powdery mildew.

## Technological potentiality

The bunches and berries are medium to large in size. Valdiguié produces colored, bright, light wines, with a low alcohol degree and tannins that are a little bit astringent.

## Clonal selection in France

There is no certified clone for this variety yet.
